Program-

```python
#!/bin/python3
t = int(input().strip())
for a0 in range(t):
    n = int(input().strip())
    c=""
    for i in range(n,-1,-1):
        if (i%3==0) and (n-i)%5==0:
            c+='5'*i
            c+='3'*(n-i)
            break
    if len(c)==0:
        print("-1")
    else:
        print(c)
```

Input-

```
4
1
3
5
11
```

Output-

```
-1
555
33333
55555533333
```
